## **Review**

Gregory C Chow, a pioneer in China's march to a market system and a distinguished professor of economics at Princeton University, has written an important sequel to his recently published book, *Interpreting China's Economy* (2010). In his new book, *China as a Leader of the World Economy*, Chow explores the evolution of China's institutions (with an in-depth discussion of the 12th Five Year Plan), analyzes the problems China needs to overcome, provides policy proposals to solve those problems, and presents the results of several quantitative studies of the Chinese economy. In 31 clearly written and concise chapters, Chow covers a broad array of topics ranging from how to stop inflation to how to improve university education. As a master craftsman and long-time student of the Chinese economy, no one is better equipped to increase our understanding of China's economic development and the future of China in the global economy.

This is a book by a senior Western-trained economist who has been an insider to the extraordinary changes in China over the past 30 years, and it is both authoritative and well-argued. --Sunday Morning Post
