Oxford-educated historian Farrell's sequel to *Saucers, Swastikas and Psyops* and his best-selling book series on suppressed technology, Nazi survival and postwar hidden conflicts. Farrell delves into the creation of a breakaway civilization by the Nazis in South America and other parts of the world. He discusses the advanced technology that they took with them at the end of the war and psychological war that they waged for decades on America and NATO. He investigates the secret space programs currently going on by the breakaway civilizations and the current militaries in control of planet Earth. Plenty of astounding accounts, documents and speculation on the incredible alternative history of hidden conflicts and secret space programs that began when World War II officially "ended."

A wholly original and timely thrill ride

By Jay Trout

No spoilers.

Dr. Farrell states in his Preface that this is not an "exciting" book, but is a "necessary" one. Well, I don't know what definition of "exciting" Farrell is using, but I think he's just being his usual humble self. While it was a relatively easier read than some of his other works, it's one of the most electrifying, and if this book is just a necessary step on the road, we better fasten our seat belts, because we're in for a hell of a ride.

Indeed, I think that Farrell is at his MOST exciting when he is engaging in what he calls "high octane speculation." But don't be misled. This is anything but pure "speculation." As always, Farrell's "speculation" is backed up with plenty of facts, an obvious plan, and a well-reasoned, well-argued, cutting-edge thesis. Farrell's writing is deliberate and concise.

For the past decade or so, Dr. Farrell has been giving us the pieces to a jigsaw puzzle. The full picture isn't quite visible, but we're getting a huge piece of the puzzle here - whole sections are now visible, and other areas are coming into view. Ideas from all of the foregoing work come together, and Farrell connects some old dots with some new ones in a way that only he can. Some of these are: the Great Pyramid, Gold Bond scandals, the Vatican, Gladio, JFK, HAARP, weather wars, 19th century airships, earthquakes, tornadoes, UFO's, topology, and yes, Nazis. Farrell's unique analysis as to how these factors relate to the breakaway civilization, and the implications of it all, are staggering - all the more so when one considers the fact that Farrell researched and wrote this book in a mere two months! (check out The Byte Show interviews)

I literally could not put this book down, and read it in record time. I simply couldn't wait to read what was coming next. In my opinion, this is Farrell at his best.

A classic, insightful book that is Farrell at his best!

By Sweet Pea #2

I have been an avid reader of Joseph Farrell for many years. This volume is a must for all who want to know what has been so well hidden from the public, yet affect us in so many ways! His discussion of the HAARP program is chilling and makes one wonder what is the cause of our "unusual" weather that seems to have had far too many, "Once in a hundred" or "five hundred years" events. We have witnessed yearly weather/earthquake catastrophes that seem to be events yearly wrecking mass destruction on our nation/world. Tornadoes of extreme strength, occurring in January in months that are normally devoid of such disasters are almost common place. WHY?? Climate change? Google "HAARP" and check out what can result from that sinister, government project and it will amaze and frighten the most devoted cynic of "conspiracies." We are living with those HAARP generated effects! The onset of these disasters is in sync with the activation of the Alaskan array of ionosphere heaters that CAN wreck such appalling destruction the world has witnessed in the last decade. "Weather warfare" is not a Star Trek fiction! The reality of a "deep state" and/or "breakaway civilization" can be seen as clearly as following the tracks of a jackal, and just as dangerous, producing evidence that begs for a reason! Farrell intricately exposes the agendas of NATO, the Vatican and all the inter related global powers that pull the strings of our world. The black trust funds with Nazi stolen gold funds black projects and off the record power players and their dark designs. I consider myself to be well read, but this volume deserves being re-read to absorb the remarkable research that gives the catalyst for global changing events. Any reader who invests their time in this book will doubtless walk away a wiser viewer of the forces that perform on the world stage.

Fascinating -- but also frustrating because of what's not in it

By Orange Newt

COVERT WARS is a don't-miss book; but I have to take off some points because it doesn't entirely deliver on the title and subtitle. What's in it? About half the book is devoted to financial matters -- state-sponsored fraud and counterfeiting, bearer bond scandals, a vast trove of gold and other treasure looted by the Japanese during World War II and confiscated/stolen again from them after the war. Farrell sketches out the shape and practices of a vast underground or "black" financial system twining around and through the public system like a cancerous jungle growth, and ties it to a number of other things including extra-nationally-sponsored terrorism by NATO's GLADIO cells. Around another third of the book is on covert or "plausibly deniable" technologies that can mimic acts of god or nature. The last section, "Covert Wars and Celestial Psyops," is about a fifth of the total, and it's actually mostly history, first of the 1897 "Airship Mystery," then of UFO incursions on nuclear tests and nuclear-equipped military sites.

What's not in the book? In the preface, Farrell offers the reader a mind-boggling and mouth-watering list of topics, and a goodly number of them are in fact dealt with at considerable length in the main text. However,

some are discussed only briefly or peripherally, and a few of the more intriguing ones evidently got squeezed out of the final draft entirely. For example, "crop circles" is on the list, and I'd like to hear Farrell's take on them; but that topic ends up getting just one sentence, on page 349. Besides extraterrestrials, Farrell dangles "sub- and crypto-terrestrials" before us; they're never even mentioned again. The secret space program? Farrell thinks there is one, and gives us a good idea of how it and other breakaway-technologies/programs have likely been financed. But as far as any details of the program and its activities, he pretty much reins in his trademark "high-octane speculation" and sticks to general "implications." Pretty much the same goes for the "celestial psyops" -- i.e., supposedly, psyops undertaken by the breakaway civilization against UFO-extraterrestrials. In the preface, Farrell refers to "secret space programs including a possible actual shooting war between earthly nations (and between them and others)" but that looks like another topic that got postponed for another book. Likewise, the most detailed speculation about examples of covert wars waged with plausibly-deniable technologies is tucked away in a footnote. Farrell mentions -- just mentions -- that the Soviet Union's destabilization and collapse was due in part to "the theft of all the Soviet Union's gold bullion (!)" Say what? Is this supposed to be common knowledge or something? I'd have been happy to hear about that in considerably more detail, but no luck. Farrell has time, though, to spend around fifteen pages on Charles Dellschau, an obscure artist possibly involved with the 1897 airships and who has a tenuous connection with a family who -- decades later -- have a connection with the Kennedy assassination.

Now don't get me wrong here. COVERT WARS is fascinating, the financial parts no less than the rest of it. I messed up my sleep cycle staying up way too late reading it three nights in a row. But the things merely mentioned are tantalizing and frustrating. I'd also like to get a clearer picture of how Farrell sees the breakaway civilization vis-a-vis the "surviving cosmic elite" and its agendas. He's exploring different aspects of the situation in different, segregated sub-series of books, of course, but other than his noting the breakaway civilization's interest in ancient history and artifacts, we might be talking about parallel universes here. Surely after -- what is it, 14 or 15 books, now? -- there could be a little more of an inclusive overview than what we've got. Oh well; whatever Farrell writes next, I'll read, but I can still wish.
